

Industry Roundtable Event: Lithium Battery Waste Management

Lithium-ion battery fires are a growing concern for the waste and recycling industry, with incidents occurring frequently.

Waste Recycling Industry Association Queensland (WRIQ) has been engaged by the Queensland Department of Environment, Science and Innovation to investigate ways of collecting and safely managing waste batteries to get them out of our waste recycling infrastructure.

MONDAY 28TH OCTOBER, 2024

COMMENCING AT 10:00 AM

RYDGES, SOUTHBANK BRISBANE

9 GLENELG STREET, SOUTH BRISBANE QLD 4101

**REGISTER
HERE**

The project involves stakeholder consultation, the preparation of action plans (short, medium and longer term), piloting industry's best ideas, identifying innovative technological solutions and the development of community awareness programs.

Your expertise and knowledge in the waste industry is invaluable as we work together to exchange ideas and insights. The event will conclude at 2 pm.

A key issues paper will be sent the week of October 14 for your review prior to the roundtable.

There will also be opportunities to contribute further as the project progresses.

If you have any questions regarding the project, or wish to discuss further, please contact our consultant project manager Keiran Travers on **0431 222 327** or keiran.travers@wriq.com.au.

Waste Recycling Industry Association Queensland (Qld) received funding from the Queensland Government's Recycling and Jobs fund to deliver Industry engagement on the management of end-of-life batteries.
